

APPENDIX D:

To the Archivision Site License Agreement (SAMPLE – subject to change without notice)

:: Request for Hosted Server Service ::

With a signed Site License agreement for the Archivision Digital Research Photo Library, you will have the option to either 1) load and host the Library in your own software and on your own server or 2) gain immediate access to it via the internet for your entire student population through payment of our annual Server Access Fees – and then DO NOTHING ON YOUR END.

for our hosted server fee schedule please see:

http://www.archivision.com/digital/access_options.htm

Please choose ONE of the following hosted server service options:

1) Via Almagest on a Princeton Server:

Note: you currently need a campus wide license to Oracle to use Almagest (Almagest uses Oracle Enterprise as its back-end database)

The Archivision Digital Library is hosted by Princeton on it's servers. Access to images and full metadata is provided to registered users at any location (IP authenticated) through Princeton's acclaimed "Almagest" software using internet browsers such as Explorer and FireFox. Each institution may upload up to 5GB of local content - additional space can be leased.

2) Via Luna Insight on a Luna Server:

Note: no software license is required to use this service (no back-end license required)

The Archivision Digital Library is hosted by Luna Imaging on Luna servers. Access to images and full metadata is provided to registered users at any location (password and ID authenticated) through Luna's acclaimed Insight Browser or Java Client.

:: more info for both hosted options ::

Set-up fee:

There is an initial set-up fee of \$350 per institution.

Take the Library back at any time:

You may elect to take the Photo Library back and host on your server AT ANY TIME – however, annual fees paid may not be reimbursed. You may take the collection back 'ready to load' in Almagest, EmbARK, or MDID. You may contract with Luna Imaging to take the collection back in Insight (see below). You may also take our images and metadata and load into any system of your choice on your own.

Sign up for the hosted service at any time:

You may at any time sign up for our hosted service. The service will be “turned on” within 10 working days of receipt of your annual payment fee and set up charges by Archivision unless you are notified otherwise or as per mutual agreement.

Annual fees:

All annual fees are based on your anticipated download (bandwidth) as per the number of students in your institution. The annual service fees paid cover the date from when your service was “turned on” until one calendar year has passed from that date (365 days). All server access fees will be quoted and billed by Archivision in US dollars and will renew automatically for successive terms, provided that the annual host service fees are paid and no notice of change of terms is given by Archivision. Annual fees are billed 60 days in advance of the renewal date. All annual hosted service fees are subject to change and/or revision based on your actual usage with 60 day notice before the end of your current service term.

Transfer of the Library to your server:

Should you wish to transfer the Archivision Digital Photo Library (including any addition modules you have licensed) to your server we will send you the metadata and all the derivative files you need for Almagest, EmbARK or MDID at no additional fee (this service is included in your Site License). If we already sent you data & files with your Site License and you wish to order “updated” images & data the fee is \$225.00 per Library module and you must return any media we send you at your cost (i.e. a hard drive). Insight clients, or those interested in taking the Library back in Insight, please see below.

Already have a license to Insight?

The Hosted Server Service is ideal for current Insight clients as this option allows you to quickly and easily add this content to your current Insight collection list through your Insight Collection Manager.

Want to take it home?

∴ Local Server and Luna Build: Migrate the entire Archivision Library to your local server as a fully built collection via Luna’s Professional Services. Contact Luna for pricing information at contact@luna-img.com.

∴ Local Server and Independent Build: Receive Insight ready images (TIFF files, additional fees apply) and metadata from Archivision and build your own collection using Insight Studio by importing the data in sets of 4000 records at a time. Luna can also provide data services to help you determine if the collection will exist on its own, or be integrated into another Insight collection.

>>> If you already have a license to Insight you will have access to additional features with the Insight hosted option. As these features will change from time to time please contact Luna Imaging directly with any questions at contact@luna-img.com.

Please Note: While every precaution has been made to avoid service interruption Archivision and our hosted server providers are not responsible nor liable in any manor for any interruption in access to the Archivision Library for your institution. Should a hosted service provider need to terminate access for any reason Archivision will, at your choice, 1) offer you hosted service with another hosted service provider (if available) or 2) offer to provide you with updated images & metadata at no additional charge so you can host on your server and in the software options then available or as you choose.
